

## American College of Embryology (ACE) Certifies Crea Conceptions' (Crea) Scientific Director.

ACE is an American based Embryologist association that sets stringent standards in the practice of Embryology. The American College of Embryology is organization of embryology practitioners, serves patients, embryologists and the public by fostering and advocating excellence in the practice of embryology. It is established to provide uniform educational and training requirements thereby assuring delivery of quality patient care as well as the continued development of embryology as a clinical specialty.

We are delighted to announce that Crea's Scientific Director, Dr. Sasikala Natarajamani was awarded 'EMB' status which is their highest level (Level IV) of certification for Practicing Embryologists globally. For more details, please visit **[www.embc.org](http://www.embc.org)**

By virtue of the above, Crea's embryology facility stands automatically accredited by ACE and an affidavit is filed with ACE in this regard. ACE has permitted us to display this certification in our website besides the name of our Scientific Director.

Please visit : **[http://www.creaconceptions.com/about\\_crea/leadership/](http://www.creaconceptions.com/about_crea/leadership/)** to view this.

Crea mission is to deliver world-class embryology practice to IVF Physicians and we will continue to have that relentless focus to specialise and excel in the field of Embryology.

To the IVF Physicians and patients, the certification assures uncompromising quality in the way we create embryos, transparent with high process rigour, fully conversant with global standards. This also ensures continuous efforts to stay on par with global processes, research and developments which we will bring into our practice at Crea.
